DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 101

Claims 25-41 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific or substantial asserted utility or a well established utility.

Claims 25-41 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

This rejection is maintained essentially for the reasons made of record in the previous Office action, mailed 5/19/06.

Applicant's arguments, filed 11/13/06 have been considered but have not been found convincing.

Applicants has argued that the standard being used by the Examiner is more appropriate to that used by the FDA, and that the data provided in the instant specification provides sufficient information regarding the PRO361 protein to show a therapeutic utility (pages 7-9). Applicants argue that since the purpose of the MLR assay in the instant specification is "to characterize, not the stimulator cells, but the test proteins such as PRO361" and further, "the point of the assay is not to measure the T

cell proliferation but rather the extent to which the test protein can suppress the expected proliferation of the stimulated T cells" (page 9). However, it is maintained that the T cell proliferation must be measured in order to conduct the MLR assay, and contrary to applicant's arguments, explicit data values are needed to conduct the assay and drawn conclusions regarding the effect of a particular molecule on T cell proliferation. It is maintained that in order to provide a therapeutic utility, further research would be required since it is not clear whether there is a significant effect of the disclosed protein on T cell proliferation, for reasons of record. Therefore, the rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
